

Exercise 2: Verifying Interactions

@Test

```
public void testVerifyInteraction() {  
    // Arrange  
    ExternalApi mockApi = mock(ExternalApi.class);  
    MyService service = new MyService(mockApi);  
  
    // Act  
    service.fetchData(); // This calls mockApi.getData()  
  
    // Assert  
    verify(mockApi).getData(); // ✓ Verifies that getData()  
was called exactly once  
}  
}
```

Output:
