React Hand-on 5

Understanding the need for styling react component Working with CSS Module and inline styles

Step1:

Not having zip file so created a react project

Step2:

Src/CohortDetails.module.css

```css
.box {
  width: 300px;
  display: inline-block;
  margin: 10px;
  padding: 10px 20px;
  border: 1px solid black;
  border-radius: 10px;
}

dt {
  font-weight: 500;
}
```

Step3:

Src/CohortDetails.js

```js
import React from 'react';
import styles from './CohortDetails.module.css';
```

```jsx
function CohortDetails(props) {
  const { name, mentor, duration, status } = props;

  // Conditional inline style for <h3>
  const headingStyle = {
    color: status.toLowerCase() === 'ongoing' ? 'green' : 'blue',
  };

  return (
    <div className={styles.box}>
      <h3 style={headingStyle}>{name}</h3>
      <dl>
        <dt>Mentor:</dt>
        <dd>{mentor}</dd>
        <dt>Duration:</dt>
        <dd>{duration}</dd>
        <dt>Status:</dt>
        <dd>{status}</dd>
      </dl>
    </div>
  );
}
```

```
export default CohortDetails;
```

Step4: update App.js

```
import React from 'react';

import CohortDetails from './CohortDetails';

function App() {
 return (
  <div className="App">
   <h1>My Academy Dashboard</h1>
   <CohortDetails
    name="React Cohort"
    mentor="John"
    duration="4 weeks"
    status="Ongoing"
   />
   <CohortDetails
    name="Java Spring Cohort"
    mentor="Jane"
    duration="6 weeks"
    status="Completed"
   />
  </div>
```

```
  );
}

export default App;
```

Step5:

Npm start

Output:
